

1. Find out all the link resolver, catalog linking, federated search, or open urls systems that your resource network might be using (e.g. OCLC's 1Cate/WorldCat Link Manager, SwetsWise Linker, Ovid's LinkSolver, EBSCO's LinkSource, Ex Libris, Innovative Interfaces WebBridge, Serials Solutions 360 Link, TDNet's TOUR, SirsiDynix's Resolver, Fretwell-Downing's OL2, WT Cox's Journal Finder, RR Bowker's Ulrichs Resource Linker, Infor's Vlink, etc).
2. Attain the list of hyperlinks that linked to LN Academic in the link servers used by these systems. (You may need to refer to your link system vendors to find out where are this links stored in, and how do you batch modify these links).
3. There are four categories of links in which you need to batch modify by doing a search and replace, namely:

#### Source-Level Links

Update source-level links.

E.g. change from first to second or third url:

- <http://www.lexisnexis.com/us/lnacademic/api/version1/sf?shr=t&sf=AC00NBGenSrch&csi=6742> (Current URL)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&csi=6742> (English Default Version)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&csi=6742&lang=ja> (Japanese Default Version)

I.e. Find/Replace to convert old URL to new URL:

Find: /us/lnacademic/api/version1/sf?shr=t&sf=AC00NBGenSrch&csi=

Replace with: /ap/academic/?verb=sf&csi=

Add "&lang=ja" at the end for Japanese default version

#### Search Form Links

To replace links to specific search forms, such as the US Federal & State Cases form.

E.g. change from first to second or third url:

- <http://www.lexisnexis.com/us/lnacademic/api/version1/sf?shr=t&sf=AC07STTaxLawSrch> (Current URL)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&sf=AC07STTaxLawSrch> (English Default Version)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&sf=AC07STTaxLawSrch&lang=ja> (Japanese Default Version)

I.e. Find/Replace to convert old URL to new URL (this can be done only after finished replacing all source-level links):

Find: /us/lnacademic/api/version1/sf?shr=t&sf=

Replace with: /ap/academic/?verb=sf&sf=

Add "&lang=ja" at the end for Japanese default version

#### Document-Level Links

Update durable links to specific documents.

E.g. change from first to second or third url:

- [http://www.lexisnexis.com/us/lnacademic/api/version1/sr?shr=t&csi=6742&sr=BYLINE\(Pogue\)+AND+HLEAD\(Books+Pop+Up\)+AND+DATE+IS+November+22+2007](http://www.lexisnexis.com/us/lnacademic/api/version1/sr?shr=t&csi=6742&sr=BYLINE(Pogue)+AND+HLEAD(Books+Pop+Up)+AND+DATE+IS+November+22+2007) (Current URL)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&csi=6742> (English Default Version)
- <http://www.lexisnexis.com/ap/academic/?verb=sf&csi=6742&lang=ja> (Japanese Default Version)

I.e. Steps to convert old URL to new URL:

Find: /us/lnacademic/api/version1/sr?shr=t&csi=

Replace with: /ap/academic/?verb=sr&csi=

Add "&lang=ja" at the end for Japanese default version

#### Canned Queries

Update URLs that run a canned query (saved search).

E.g. change from first to second or third url:

- [http://www.lexisnexis.com/us/lnacademic/api/version1/sr?shr=t&csi=8422&sr=HLEAD\(congress+AND+vote\)+AND+DATE>=%25CURRDAT E-7%25](http://www.lexisnexis.com/us/lnacademic/api/version1/sr?shr=t&csi=8422&sr=HLEAD(congress+AND+vote)+AND+DATE>=%25CURRDAT E-7%25) (Current URL)
- [http://www.lexisnexis.com/ap/academic/?verb=sr&csi=8422&sr=HLEAD\(congress+AND+vote\)+AND+DATE>=%25CURRDAT E-7%25](http://www.lexisnexis.com/ap/academic/?verb=sr&csi=8422&sr=HLEAD(congress+AND+vote)+AND+DATE>=%25CURRDAT E-7%25) (English Default Version)
- [http://www.lexisnexis.com/ap/academic/?verb=sr&csi=8422&sr=HLEAD\(congress+AND+vote\)+AND+DATE>=%25CURRDAT E-7%25&lang=ja](http://www.lexisnexis.com/ap/academic/?verb=sr&csi=8422&sr=HLEAD(congress+AND+vote)+AND+DATE>=%25CURRDAT E-7%25&lang=ja) (Japanese Default Version)

I.e. Steps to convert old URL to new URL (this step should already be covered same as document-level links):

Find: /us/lnacademic/api/version1/sr?shr=t&csi=

Replace with: /ap/academic/?verb=sr&csi=

Add "&lang=ja" at the end for Japanese default version

4. After the search and replace is done, please import the new links back into the systems to activate the links if necessary. Check and clarify that the deep links are working correctly and are going to the new Asia CUI.
5. If you need more detailed information for replacing these links, you can refer to the Subscriber Tools site (in English). This site provides documentation for using the LexisNexis Academic URL to build links including durable URLs, title-level links, saved searches, and links to search forms. Please consult that site for documentation on:

- a. LexisNexis Academic URL API Specification - [http://www.amdev.net/lna\\_url\\_api.php](http://www.amdev.net/lna_url_api.php)
- b. A-Z Title List with title-level links - [http://www.amdev.net/rpt\\_std\\_content.php](http://www.amdev.net/rpt_std_content.php)
- c. A-Z Migration Spreadsheet showing old and new version of links for each source - [http://www.amdev.net/rpt\\_std\\_content.php](http://www.amdev.net/rpt_std_content.php)
- d. OpenURL Title List with linking syntax for document-level links - [http://www.amdev.net/rpt\\_open\\_url.php](http://www.amdev.net/rpt_open_url.php)
