

[Testing compatibility of EzProxy with new Asia LexisNexis Academic Universe]

1. First visit the library or database resource network from outside the university. (You need to do that to simulate the usage of EzProxy. Please ensure you have an EzProxy account set up already.)
2. Look for the LexisNexis Academic link and access it. (This should activate the EzProxy login prompt.)
3. Login to your EzProxy account. (This should redirect to the LexisNexis Academic website via the ezproxy domain, e.g. <http://ezproxy.example.uni.cn/us/lnacademic/>)
4. After logging in, change the EzProxy directory url to /ap/academic/, retaining the EzProxy domain. (e.g. <http://ezproxy.example.uni.cn/us/lnacademic/> => <http://ezproxy.example.uni.cn/ap/academic/>)
5. You should see the new Asia LexisNexis Academic interface. Conduct a number of different searches (at least 5) on the easy search, power search and any other tabs you may choose.
